

Gender-Responsive Approaches to Building Climate and Disaster Resilience

Angie Dazé

July 2020

People's vulnerability to climate change and disasters varies based on where they live, how they sustain their livelihoods and the roles they play in their families and communities.

Gender interacts with other factors – including age, disability, ethnicity and sexual orientation – to influence vulnerability to climate change and disasters.

A gender-responsive approach to building climate and disaster resilience

Recognition of gender differences in needs and capacities for managing climate and disaster risks

Gender-equitable participation and influence in planning and decision-making processes

Gender-equitable access to finance and other benefits resulting from investments in resilience building

Climate Change and Gender Focal Points Workshop

Toolkit for a Gender-Responsive National Adaptation Plan (NAP) Process

Developed in collaboration
with the Adaptation
Committee and the Least
Developed Countries Expert
Group (LEG) under the United
Nations Framework
Convention on Climate
Change

Knowledge, Attitudes, Behaviours and Practices Analysis

Study of 9 countries in the Caribbean to explore individual and institutional biases related to gender in national climate change and disaster risk management coordinating bodies, in partnership with UN Women
