ParlAmericas statement on the situation in Ecuador

In response to the mobilizations and demonstrations that have taken place in Ecuador and spread to several cities in the country, ParlAmericas expresses its support for democratic dialogue and peaceful, consensus-based resolution of conflicts, with observance for the Rule of Law.

Open dialogue and collaboration among all actors is essential to reaching a peaceful solution to this political crisis with full respect for human rights. National parliaments are crucial actors in these processes, given their essential role in the balance of State powers.

With recognition of the universal principle of sovereignty, ParlAmericas calls for cooperative political dialogue among all actors to overcome the political crisis, continue strengthening democracy and its institutions, and ensure a climate of peace for the political and social stability of the country.
